Community Transportation Needs Assessment – Resident Survey

[Organization] is conducting a transportation needs assessment survey to hear from [City/Community] residents on their current travel behavior and preference for future transportation enhancements and projects. This survey is an effort to improve transportation options in [city/community].

Please answer the following questions about your personal and household transportation needs. This survey takes about [xx] minutes to complete, and all personally-identifiable information will be confidential. You are free to skip questions you do not feel comfortable answering.

This survey is adapted from a template developed through the State of California's Clean Mobility Options program, part of the "California Climate Investments" (CCI) program. The Clean Mobility Options Voucher Pilot Program (CMO) is a statewide initiative that provides funding for zero-emission shared mobility options to under-resourced communities in California. CMO is available throughout California to eligible disadvantaged communities, as well as eligible low-income tribal and affordable-housing communities, to increase access to safe, reliable, convenient and affordable transportation options.

Key Terms

Public Transportation

The system of travel options on public vehicles, such as buses, trains, and ferries. Local examples include [list local examples here such as bus, light rail, shuttle options, etc.]

Carshare

A service that allows you to rent a car by the minute or hour. Some examples are ZipCar, Getaround, and GIG [insert local examples if applicable]. You are charged by time and/or distance. Car sharing provides most of the benefits of owning a car, without many of the costs, like insurance, repairs, and gas.

Electric Cars

Cars that run on electricity, rather than gas. They are an environmentally-friendly option to traditional cars, and help reduce air pollution. They need to be charged periodically at designated charging stations.

Electric Bicycles

An electric bicycle, or e-bike, looks a lot like a traditional bicycle, but has an electric motor that provides a boost when you pedal. The motor makes it possible to use the bike with less effort, especially up steep hills.

Bikeshare

Bicycles that are available around the city to rent by the minute or hour. To ride, either check out the bike from a dock, or use your smartphone to locate and unlock the bikes wherever they're available (as with Jump or Lime). They are usually found at bike racks or on sidewalks. Some services offer electric bikes as well as regular bikes.

Microtransit

Microtransit is a flexible routing/scheduling transit option that connects people and places to existing transit systems. This transit service is similar to a bus and uses minibuses or shuttle services with pick-up and drop-off at a designated stop or curbside meeting area.

Lightrail

A rail transportation system involving trolleys, streetcars, or other, usually electrified methods, whose rails are primarily on surface streets that are shared with other forms of transportation.

Scotershare

Electric scooters, or e-scooters, that are available to rent by the minute or hour. Scooters are parked around the city, usually on sidewalks. They can be located and unlocked using a smartphone – some examples are Bird, Lime, Skip, and Scoot.

Carpool/Vanpool

An arrangement between people to make a regular journey in a single vehicle, typically with each person taking turns to drive the others. Carpooling usually involves 5 or less people, while vanpooling typically includes 5 or more people riding together, usually to work.

Rideshare

An arrangement in which a passenger travels in a private vehicle driven by its owner, for free or for a fee, especially as arranged by means of a website or app.
